APRILAIRE 1850 Dehumidifier - Use Manual - Use Guide PDF Documents: Go to download! User Manual Owner's manual - (English) Other Documents Specification Sheet - (English) User Guide APRILAIRE 1850 DehumidifierSetting the Desired Humidity LeThe UP and DOWN arrow buttons allow the humidity level to be set from 40% to 80% relative humidity. Use the ON/OFF button to turn the dehumidifier ON or OFF. Set the control at 55%RH when first installed.Allow the dehumidifier to run until it reaches the setting before deciding if you want to change the setting. If you prefer the air to be more dry, decrease the humidity setting. If you prefer the air to be less dry, increase the humidity setting. Your comfort is the best measure of how to adjust your setting.When first installed, your dehumidifier has to remove all the moisture that is initially in your home.The home acts like a sponge so the moisture in the materials of your home is at the same level as the air.After drying the air, the materials of the home will release moisture back into the air until they are again at the same level. As a result, it is not uncommon for the dehumidifier to operate for an extended period when first installed.External control OPTIONSYour Aprilaire dehumidifier can be controlled with an optional external control that is conveniently located in the living space.The Aprilaire Model 76, 8620, and 8910 are recommended controls. The Model 76 is a dedicated dehumidifier control and the 8620 and 8910 integrate dehumidification control as part of the thermostat minimizing the number of controls on the wall.The Model 76 can also act as a remote control if the dehumidifier is located in a crawl space.Install the Model 76 in your living space and make changes to the dehumidifier setting or find out what the humidity level is in the crawl space from the comfort and convenience of the living space.Clean or Replace the Air FilterAfter initial installation the air filter should be checked and cleaned every 6 months.The CLEAN FILTER service reminder will display on the on-board control screen every 6 months. To clear the service message, press the UP and DOWN arrows simultaneously for 3 seconds.Filter Cleaning Procedure Turn the ON/OFF switch OFF. Remove the filter access door from either side of the dehumidifier. Slide the filter out of the dehumidifier.Flush the filter with warm water and a mild detergent solution. Shake off the excess water from the filter.Replace the filter, making sure the filter is secured in both the top and bottom filter rails.Replace the filter access door.Turn the ON/OFF switch ON. Press the UP and DOWN buttons simultaneously for 3 seconds to clear the service message.Newest Added: 8620W AP09550PTags: Aprilaire Dehumidifiers Use Manual
